

> **C:\pkg2\1899 - Metadata Done**

Enter the intermediate destination directory.
This should be on a local drive (like C:\).
Duplicate destination files won't be overwritten.

> **C:\pkg2\1899\intermediate**

[OPTIONAL] Enter the final destination directory.
Leave blank to skip this.

> **C:\pkg2\1899\final**

Enter the years to run.

> **1899**

8. Review 1899 Resolution Error List and 1899 Statue Error List and fix any files that did not process correctly.
9. Review caml files to make sure that the Metadata has been correctly updated.
10. Copy good caml files **final directory** back to HistoricalStatutes\Work-In-Progress\1899-Metadata
Done
